

WORKSHOP 23

DATE: 22/09/2023

TIME: 4.30 PM

HOW INTEGRATIVE MEDICINE IN VETERINARY CAN PROVIDE A CONTRIBUTION TO RESEARCH IN HUMAN HEALTH

Sponsored by

105 minutes

According to an increasing number of studies, domestic animals (PETs) can contribute to research in human health. PETs can alleviate human patients' psychological and physical suffering, helping them better face the therapeutic strategies' side effects and eventual hospitalization. It has been shown that an adequate man/patient and PET relationship induces essential benefits to various health aspects, such as safety, self-esteem, emotional balance, and some functional motor problems as well. This workshop principally aims at defining the state of the art of Integrative medicine and nutrition in domestic animals in connection with human health.

Chairpersons: Dr. Alessandro Benvenuti and Dr. Carla Fiorentini ARTOI Foundation, Rome

1. Dr. Alessandro Benvenuti , Dr. Valerio Paziienza (20 min) "The importance of studying the dog microbiota in reference to chronic inflammatory diseases in medicine and integrated nutrition".
2. Prof. Maurizio Scozzoli, Dr. Maura De Vito (18 min) "Essential oils for the control of Dermatophytosis in rabbits"
3. Prof. Enrico Gugliandolo, Prof.ssa Rosalia Crupi (18 min) "Integrative medicine: cannabinoids for human and animal health"
4. Dr. Alessandra Frosi (18 min) "Ozone therapy in Integrative Medicine: a keystone between Allopathy and Low Dose Medicine"

5. Dr. Donato Sarcinella (20 min) "Hippotherapy activities for autistic subjects: the use of quantum information systems for a better man-horse relationship"

Speakers

Dr. **Alessandro Benvenuti** - ARTOI Foundation - Chair of the Veterinary section, Gastroenterology Unit

Dr. **Valerio Paziienza** - Fondazione I.R.C.C.S. "Casa Sollievo della Sofferenza" Hospital San Giovanni Rotondo FG

Prof. **Maurizio Scozzoli** - University of Bologna (Forlì)

Dr. **Maura De Vito** - Cattolica del Sacro Cuore University, Pol. Gemelli, Rome

Prof. **Enrico Gugliandolo**, Prof.ssa **Rosalia Crupi** - University of Messina, Department of Veterinary Sciences

Dr. **Alessandra Frosi** - H.O.S. - Resp. Health's Ozone Society Scientist

Dr. **Donato Sarcinella** - Scientific Manager of the Mega and Paint Association "Born free".

In collaboration with Dr. Andrea Gadducci, Scientific Manager of Quantum Vitae Association.
